Town Celebrates the Completion of the East Market Street Widening Project

Ribbon Cutting Ceremony for the street widening project to be held June 22, 2004 at 7:00 PM, at 319 E. Market Street (Verizon Building parking lot)

The Town of Leesburg is pleased to announce the opening of the recently improved East Market Street. This project took 12 months to complete. It consisted of widening 2500 feet of roadway, reconstruction of 5000 feet of sidewalk, 4700 square feet of imprinted crosswalks, and a new traffic signal at the intersection of East Market Street and Catoctin Circle, as well as state of the art pedestrian signals with countdown timers.

The completion of the project occurred three months ahead of schedule. The Town would like to formally recognize the hard work, time and dedication put forth by the Town staff members who helped to achieve this excellent result, including the project manager Renee LaFollette-Capital Project Engineer, John Creamer and his staff with the Utility lines Division, along with Inspectors David Farrey and Doug Pratt of Alpha corporation. The town's contractor was Rustler Construction of Lanham Maryland.

A ribbon cutting ceremony, with the Honorable Kristen Umstattd and Town Council officiating, will be held at 7:00 PM on Tuesday, June 22, 2004 at 319 E. Market Street (Verizon Building parking lot).
